■ Full Stack web developer

| Backend Developer | Frontend developer

| Javascript | React.js | Redux.js

| Express.js | PostgreSQL

Full Stack Developer with international background in sales and commerce, which has allowed me to master skills such as teamwork, leading teams of up to 6 members, decision-making, and effectively offering services and products to the specialized public.

I specialize in Front-end development with

React.js, Redux.js (Toolkit), using pure CSS, and frameworks like MaterialUI. In the Back-end, I am experienced in implementing Node.js, Express.js, and have worked with Firebase and Firestore for multimedia storage and user control. I have hands-on experience with both relational databases using PostgreSQL and non-relational databases with MongoDB.

I am well-versed in agile methodologies, particularly SCRUM, and proficient in version control using GIT. I have knowledge of data structures and algorithms and am a Linux user (Ubuntu 22), which allows me to navigate between files, databases, and version control using the Bash terminal. I use GitHub for collaborative development and storage.

With a strong focus on results, I excel at collaborative work and effective communication.

English Level: C1 Advanced

Experience and Projects. Portfolio: <https://devdiego.vercel.app>

Full Stack Web Developer - Booking engine for Hotels. jun. 23 - jul. 23

<https://sunsetsandsdev.vercel.app/> VIDEO: <https://vimeo.com/846128451>
