Summary

Web developer with experience in Front-end and Back-end technologies. Proficient in creating user interfaces with React.js and Redux, and implementing styles with CSS and frameworks like MaterialUI. Experience in developing servers and APIs with Node.js and Express, and managing both relational and non-relational databases. Familiar with agile methodologies such as SCRUM and version control tools like Git and GitHub. Regular user of Linux systems, known for effective communication and a detail-oriented approach. Currently seeking a full-time programming opportunity.

Professional Experience

Jr Full Stack Developer

Siempre Mas, Argentina (part-time, remote)

January 2024 – Present

- Developed and maintained functionalities in the single sign-on system for a customer loyalty system, resulting in a 20% increase in user engagement.
- Improved responsiveness for various screen sizes, enhancing mobile user experience by 30%.
- Technologies: React, Sass, Firebase Auth, YUP, Formik, React Context, Express.js, Firebase Functions, Firestore.
- Used Git and Bitbucket for version control, and managed tasks with Trello.

Development Supervisor

Neurón, Venezuela

February 2024 – May 2024

- Supervised the development team for the "Payá" transportation services application, leading to a 15% reduction in project completion time.
- Implemented SCRUM methodology, and used GitHub, Jira, Slack, and Trello.
- Technologies used: Angular, Ionic, Express, PostgreSQL.
- Managed time and optimized resources, ensuring the quality of the final product.

Full Stack Web Developer

Hotel Reservation Engine

June 2023 – July 2023

- Designed and developed a hotel room reservation app in collaboration with seven developers, resulting in a user satisfaction score of 4.8/5.
- Features: user authentication, searches, filters, sorting, user banning, email sending, stock control, payment integration, user and hotel account management.
- Planning with Figma, Trello, and GitHub.

Technical Skills

- **Languages:** JavaScript (Experienced), TypeScript (Competent)
- **Front-end:** React.js (Experienced), Redux.js (Toolkit) (Experienced), MaterialUI (Competent), Vite (Experienced), Crypto.js (Competent), Formik (Competent), YUP (Competent)
- **Back-end:** Node.js (Experienced), Express.js (Experienced), Sequelize (Competent), Express Validator (Competent), Node Mailer (Competent)
- **Databases:** Firestore (Experienced), PostgreSQL (Competent), MongoDB (Competent)
- **DevOps:** Git (Experienced), GitHub (Experienced), Bitbucket (Experienced)
- **Agile Methodologies:** SCRUM (Experienced)
- **Platforms and Tools:** Firebase (Experienced), Trello (Experienced), Jira (Experienced), Slack (Experienced), Notion (Competent)
- **Operating Systems:** Linux (Ubuntu 22) (Experienced), Bash (Competent)

Education

- **Full-Stack Web Development Bootcamp**
Henry Bootcamp (800 hours of theoretical and practical training) - 2023
- **Front-End Web Development Course**
Platzi - 2022
- **Terminal and Command Line Course**
Platzi - 2022
- **Professional Git and GitHub Course**
Platzi - 2022
- **Memory Management and Algorithms in C Course**
Platzi - 2023

Personal Projects

- **Landing Pages for Motorcycle Dealerships, Healthcare Professionals, and Grocery Stores**
 - Developed and designed customized landing pages based on client requirements using React.js and MaterialUI, leading to an average increase of 25% in client inquiries.
