

Diego Pacheco

🖥️ **Web Developer (English C1)** 📍 Medellín, Colombia ☎ +573023449160 🌐 [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Summary

Full Stack Web Developer with experience in both **Front-end and Back-end**. Skilled in React.js, styling with **CSS/SASS**, and frameworks like Material UI. Development of isolated components using **Storybook** and publishing to **NPM**.

On the back-end, proficient in **Node.js with Express**, using **TypeScript and JavaScript**, under **clean architecture** and **SOLID principles**. Knowledgeable in both relational and non-relational **databases**. Familiar with agile methodologies like **SCRUM** and version control using **Git (GitHub, BitBucket)**.

Experience in CI/CD integrating GitHub and Vercel, automating deployments and improving development efficiency. I also leverage **AI tools** such as **GitHub Copilot, Mistral, Claude, Gemini, Vercel's V0, and ChatGPT** to optimize processes and enhance productivity in software creation.

Advanced **Linux** skills, effective communication, and strong attention to detail. I'm seeking a role where I can contribute my expertise in building robust and scalable systems.

Professional Experience

Full Stack Developer

Siempre Más, Argentina *January 2024 – Present*

- Developed and maintained features for a Single Sign-On (SSO) system used in a customer loyalty program, leading to a 20% increase in user engagement.
- Improved responsiveness across multiple screen sizes, enhancing the mobile user experience by 30%.
- Created a visual component library in React using Storybook and published it on NPM, streamlining the UI development for a transaction validation and points accumulation system.
- Technologies: React, Sass, Firebase Auth, YUP, Formik, React Context, Express.js, Firebase Functions, Firestore.
- Used Git and Bitbucket for version control and managed tasks with Trello.

Development Supervisor

Neurón, Venezuela *February 2024 – May 2024*

- Supervised the development team for the transportation service app "Payá", reducing project completion time by 15%.
- Implemented SCRUM methodology and used GitHub, Jira, Slack, and Trello.
- Technologies: Angular, Ionic, Express, PostgreSQL.
- Managed time and optimized resources, ensuring high product quality.

Full Stack Web Developer

Hotel Booking Engine *June 2023 – July 2023*

- Designed and developed a hotel room booking app with a 7-member team, achieving a 4.8/5 user satisfaction score. Features included user authentication, user banning, email notifications, stock control, payment integration, and account management for users and hotels. Planned with Figma, Trello, and GitHub. [Video Demo](#)

Freelance Projects April 2019 – June 2023

- Collaborated and worked independently on various tasks and projects for local and remote clients, gaining freelance development experience and improving client communication.

Technical Skills

- **Languages:** JavaScript (Advanced), TypeScript (Proficient)
- **Front-end:** React.js (Advanced), Redux Toolkit (Proficient), MaterialUI (Proficient), Vite (Advanced), Crypto.js (Proficient), Formik (Proficient), YUP (Proficient)
- **Back-end:** Node.js (Advanced), Express.js (Advanced), Sequelize (Proficient), Express Validator (Proficient), Node Mailer (Proficient)
- **Databases:** Firestore (Advanced), PostgreSQL (Proficient), MongoDB (Proficient)
- **DevOps:** Git (Advanced), GitHub (Advanced), Bitbucket (Advanced)
- **Agile Methodologies:** SCRUM (Advanced)
- **Platforms & Tools:** Firebase (Advanced), Trello (Advanced), Jira (Advanced), Slack (Advanced), Notion (Proficient)
- **Operating Systems:** Linux (Ubuntu 24) (Advanced), Bash (Proficient)

Education

- **CI/CD Bootcamp with GitHub Actions:** Microsoft-CódigoFacilito - 2025
- **Full-Stack Web Development Bootcamp:** Henry Bootcamp (800 hours of theoretical and practical training) - 2023
- **Front-End Web Development Course:** Platzi - 2022
- **Terminal and Command Line Course:** Platzi - 2022
- **Professional Git and GitHub Course:** Platzi - 2022
- **Memory Management and Algorithms in C:** Platzi - 2023
- **Other courses and learning sources:** 2018 - 2021

Ongoing Personal Projects

- **Landing Pages for Motorcycle Dealerships, Health Professionals, and Food Stores**
 - Custom landing page development based on client requirements using React.js and Express.js. Estimated average 25% increase in customer inquiries.

Personal Competencies

- Availability, adaptability, positive attitude, continuous learning, and eagerness to gain experience.
- Proven adaptability by quickly learning and implementing new technologies across various projects, contributing to their successful completion.
- Passionate about learning, as shown by consistent enrollment in professional development courses and certifications.
