<https://www.Github.com/diegoaph>

web: <https://DevDiego.vercel.app>

Develop Front-end with React.js, Redux.js (Toolkit), using pure CSS and frameworks like MaterialUI. On the Back-end, implement Node.js Express.js, Firebase, and Firestore for storing multimedia and user management, relational databases with PostgreSQL, and non-relational databases with MongoDB. Apply agile methodologies like SCRUM and version control with GIT.

I'm a Linux (Ubuntu 22) and Bash user. I use GitHub to store and collaborate on projects. Effective communication and a focus on results and details characterize me.

Experience:

Full Stack Web Developer - Hotel Reservation Engine. Jun. 23 - Jul. 23

<https://sunsetsandsdev.vercel.app/>

VIDEO: <https://vimeo.com/846128451>

Academic Experience:

Designed and developed a hotel room reservation app in collaboration with seven developers. The app includes user authentication, search, combined filtering, sorting, user banning, email sending, date-based stock control to sell the same room on different dates, Google or user-created login, payment processing, user account management, hotel and room management.

Planning: Figma, Trello, GitHub

Front-end: Vite, React.js, Redux.js (Toolkit), MaterialUI, Firebase, Crypto.js

Back-end: Node.js, Express.js, Express Validator, Node Mailer

Database: MongoDB, Mongoose

Full Stack Web Developer - Video Game Catalog. May. 23 - Jun. 23

<https://devdiego-videogames.vercel.app>

Academic Experience:

Designed and developed an app to display a catalog of video games that can be filtered and organized based on various characteristics. The results are displayed on pages that users can navigate. Managed data obtained from a private API, created new records through a form controlled with JavaScript validations, and stored them in a relational database.

Full Stack Web Developer - Rick & Morty Character App. Apr. 23 - May. 23

<https://devdiego-rickymorty.vercel.app>

Academic Experience:

Designed and developed an app to display a list of characters from the animated series "Rick & Morty." The app allows users to search for specific or random characters, add and remove them from favorites, filter and sort based on their characteristics, and manage data from a public API.

EDUCATION:

Full-Stack Web Development BootCamp at Henry Bootcamp. 800 hours of theoretical and practical training. 2023

Front-End Web Development Course at Platzi. 2022

JavaScript School at Platzi. 2022

Terminal and Command Line Course at Platzi. 2022

Professional Git and Github Course at Platzi. 2022

Memory Management and Algorithms in C Language Course at Platzi. 2023

LANGUAGES:

English: C1
