Professional Summary

Product-focused Frontend / Fullstack Developer with hands-on experience building and maintaining production web applications. Strong background in React and TypeScript, with experience designing scalable UI architectures, reusable component libraries and robust frontend flows.

Experienced in backend development using Node.js, Express and Firebase Functions, applying clean architecture principles, modular design and clear domain separation. Comfortable working end to end, from product requirements to deployment and monitoring.

Self-taught developer with a strong ownership mindset, used to collaborating with product, design and business stakeholders. Focused on maintainability, performance and delivering real business impact.

Work Experience

Frontend / Fullstack Developer — Siempre Farmacias, Argentina Dec 2023 - Present

- Developed and maintained a customer SSO and loyalty platform, enabling registration, authentication, profile management and points tracking.
- Built complex frontend flows with advanced form validation, conditional logic and full responsive support.
- Designed and implemented backend services using Express and Firebase Functions, including authentication, transactional services and secure API communication.
- Developed an offline-first desktop application using Electron, React and SQLite for pharmacy checkout validation, integrating multiple external services.
- Applied clean architecture and functional programming patterns using fp-ts to ensure robust error handling and domain separation.
- Created and maintained a shared React component library documented with Storybook and published to NPM, improving UI consistency and development speed.
- **Technologies:** React, TypeScript, Express, Firebase Functions, Firestore, Electron, SQLite, fp-ts, Storybook.

Frontend / Fullstack Developer — Restaurant Multi-Location Website Dec 2025 - Present

- Designed, developed and deployed a multi-location restaurant website, handling UX, frontend and production deployment.
- Built a mobile-first, conversion-oriented interface focused on clear navigation and delivery access.
- Managed domain configuration, hosting and production release.
- The project increased in-store visits by 35 percent and delivery orders by 20 percent within months.
- **Technologies:** React, TypeScript, CSS, SEO fundamentals, Vercel.

Frontend / Fullstack Developer — Healthcare Professional Website Feb 2025 - Present

- Designed and developed a professional website for a healthcare specialist with focus on patient conversion and usability.
- Implemented a secure lab results verification system for patients.
- Improved patient conversion by 20 percent through optimized UX and clear call to action flows.
- **Technologies:** React, TypeScript, CSS, Firebase.

Education and Certifications

- EF SET English Certificate 76/100 C2 Proficient
- AI Development Foundations Certificate, BIG School

- CI/CD Bootcamp with GitHub Actions, Microsoft CodigoFacilito
- Fullstack Bootcamp, Henry

Technical Skills

- **Languages:** JavaScript, TypeScript
- **Frontend:** React, Vite, Redux Toolkit, Material UI, Sass, Formik, Yup, Storybook
- **Backend:** Node.js, Express, Firebase Functions, REST APIs, basic GraphQL
- **Databases:** Firestore, PostgreSQL, SQLite, MongoDB
- **DevOps and Tools:** Git, GitHub, CI/CD, Firebase, Vercel, Jira, Trello, Slack
- **Practices:** Clean Architecture, SCRUM, functional programming fundamentals

Personal Projects

Developed multiple landing pages and product websites for healthcare, retail and food businesses, achieving an estimated 25 percent increase in inbound leads. Built demo projects integrating GraphQL APIs with Express and Firebase.

Personal Skills

Strong communication, adaptability and continuous learning mindset. Comfortable working remotely with international teams and managing responsibilities autonomously.
